## About Me

---

I am an aspiring Software Engineer with a background in distribution control and data analysis, where I developed a strong eye for detail, problem-solving skills, and process optimization strategies. In my previous role, I leveraged data-driven insights to improve inventory management and streamline workflows, enhancing operational efficiency. Now, I am expanding my technical expertise in React, Python, and software development principles, actively applying my skills to real-world projects. With a passion for building impactful software and a commitment to continuous learning, I am eager to contribute to a collaborative team where I can create scalable solutions and drive innovation.

## Working Experiences

---

### Finance / PT Bumimulya Sejahtera Makmur

December 2022 - February 2023

- Designed a financial system that improved fund security, reducing unauthorized transactions by 25%.
- Created a payroll calculation template, cutting payroll processing time by 20% and ensured timely payments.
- Implemented budget tracking, reducing operational costs by 15%.
- Developed financial reporting templates, improving data accuracy and cutting reporting time by 20%, enabling faster decision-making.

### Distribution Control / PT Penta Artha Impressi

April 2022 – November 2022

- Developed an inventory request template that accelerated processing time by 30%, reducing delays from 6 days to 4 days.
- Optimized logistics, cutting transport costs by 25% while improving delivery reliability.
- Implemented a stock-sharing system that cut excess inventory by 20%, balancing stock levels for branches.
- Collaborated with internal control teams to improve inventory accuracy by 10%, minimizing stock discrepancies.

### Admin Office / PT Arenti Advance Solusi

April 2021 – March 2022

- Automated payroll processing, increasing efficiency by 20% and ensuring timely salary disbursement.
- Enhanced accounting workflows, reducing financial statement preparation time by 10%.
- Streamlined financial reporting using Zahir, cutting closure time by 50% and improving accuracy.
- Optimized procurement documentation, cutting approval time by 15% and improving audit compliance.

## Education

---

### RevoU

June 2024 – December 2024

Full Stack Software Engineering

*Proper code for frontend with react and backend with python.*

### Budi Luhur University

September 2013 – March 2017

GPA: 3.19

Bachelor of Economy & Business

*Analysis of the Level of Understanding of Tax Sanctions, Understanding of Tax Amnesty, Taxpayer Awareness, and the Quality of Tax Office Services on the Compliance of Individual Income Taxpayers.*

## Additional Information

---

### Technical Skills:

- **Accounting application: Zahir**
- **Office Tools: Microsoft Office**
- **Development tools: Postman, Visual Studio Code, Github.**
- **Frontend Development: React.Js, Html, CSS, Tailwind, Javascript**
- **Backend Development: Python, Flask**

**Soft Skills:** Data Analysis, Problem-Solving, Workflow Optimization, Attention to Detail, Analytical Thinking.

### Certification:

- [Full Stack Software Engineering](#), Revou (PT Revolusi Cita Edukasi) June 2024 – December 2024
